

Involvement Opportunities

The Department of Electrical and Computer Engineering values its interactive relationships with the corporate community. We seek to explore new opportunities to partner in research, outreach, teaching and extension. There are many ways we can together foster our students and your future employees.

Senior Design

Senior Design students apply engineering principles to solve real-life projects. Students work closely with their corporate sponsors and learn and apply teamwork, leadership and communication skills.

Seminar Series

Be a guest speaker at our student organization seminar series. Each student organization hosts its own series; each request a donation to provide catering for attendees and to assist with the activities of their student group.

Scholarships

Some corporations have found that funding named scholarships in the department can lead to great future employees. You may specify the scholarship go to younger students to create relations that can lead to internships or co-ops.

Fellowships

Establishing a research assistant fellowship in your area of interest is a great way to build crucial relationships with research faculty, who can assist in identifying undergraduate and graduate students of great professional promise.

Involvement Opportunities

In the Department of Electrical and Computer Engineering at NC State, we have many activities that we would like to have companies become involved with. Whether it be sponsoring our Undergraduate/Graduate Research Symposiums, sponsoring our department recruiting materials or supporting our student groups, there are a multitude of ways to do so.

Welcome Back Bash
